Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hosokawa et al., U.S. Pre Grant Publication 2002/0045061.

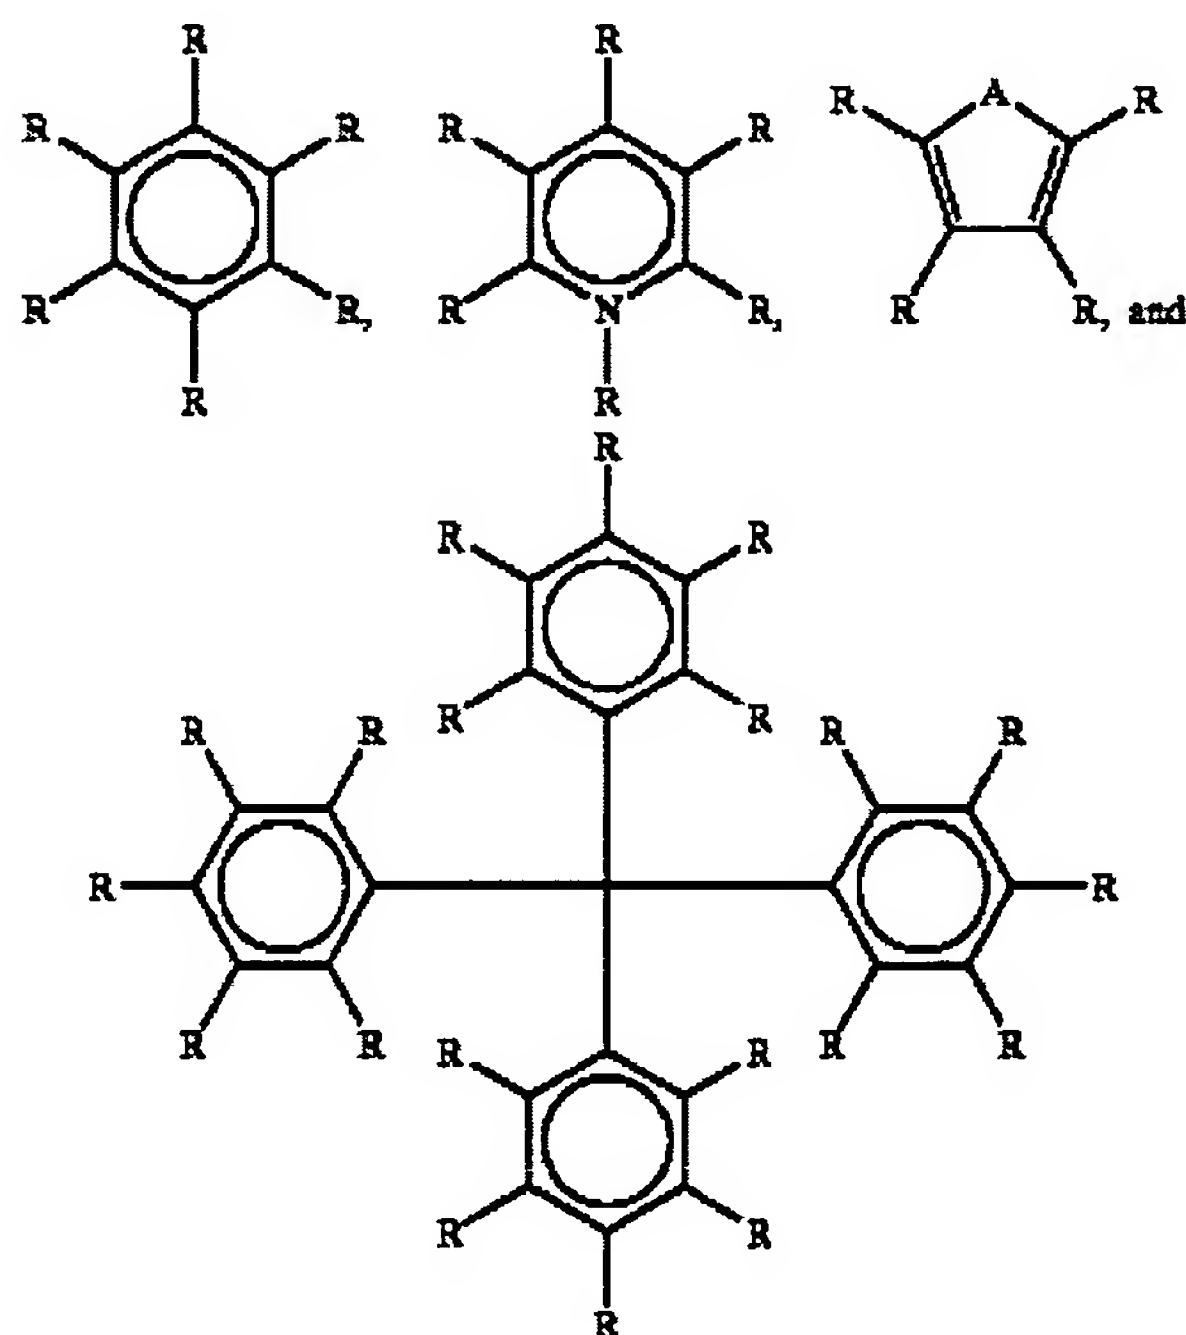

Hosokawa discloses an organic electroluminescent element comprising an anode and cathode with an organic luminescence layer disposed therebetween (see paragraph 0021-0024).

Additionally, the reference discloses that the organic luminescence layer comprises a carbazole derivative and a phosphorescent dopant (see paragraph 0021-0024). Paragraph 0042 discloses that the phosphorescent dopant is a metal complex wherein the metal is iridium, platinum or osmium. The reference discloses carbazole based host materials, as does applicant's specification. It would be inherent for the carbazole-based host material of the reference to have reorganization energy of from than 0 to 0.50 eV since the host materials are the same for the reference and present claims.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Thoms et al., U.S. Pre Grant Publication 2003/0205696.

Thoms discloses carbazole-based materials for guest-host electroluminescent systems. The reference discloses that the host material comprises a compound having a carbazole core such as

wherein A is O, S or N and at least two R are carbazole or substituted carbazole and guest is a phosphorescent emitter. Paragraph 0015 of the reference discloses a suitable guest emissive such as tris(2-phenylpyridine) iridium. Paragraph 0013 discloses that the guest emitter is a phosphorescent emitter with a peak wavelength below about 500 nm. The reference discloses carbazole based host materials, as does applicant's specification. It would be inherent for the

Art Unit: 1774

carbazole-based host material of the reference to have reorganization energy of from than 0 to 0.50 eV since the host materials are the same for the reference and present claims.
